Artist Statement

For this webpage, I really wanted to experiment with a few different things. The first thing I had wanting to play with, was with seamless patterns, which I used for the background of my web site. I feel that it adds for some visual interest, while being a perfect for web use; the tile I used was small in file size, while still covering a broad area.

As for a color scheme, I was going toward something a bit more modern than I usually work with. I felt a dark brown base, with lighter tan, gold and turquoise kept things neutral while having contrast and interest amongst its self. The turquoise really pops against the brown, without being too overbearing.

For the design and layout of my page, I wanted to stay with what I knew, and what was simple, since designing for web was new to me. I kept my layout balanced and symmetrical, by roughly dividing the whole of the screen into 3rds, with only the center area containing the content, as keeping roughly with the rule of the golden proportion.
